## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, drawn to a method of treating cancer, classified in class 514, subclass 410.
  - II. Claims 11-19, drawn to a method of protecting normal tissue of a mammal from the toxic effects associated with gene therapy, immunotherapy, radiotherapy or chemotherapy, classified in class 514, subclass 410.
  - III. Claims 20-28, drawn to a method of preventing cancer, classified in class 514, subclass 410.
1. The inventions of Group I-III represent separate and distinct methods. They differ with respect to the subjected treated, and final results. Particularly, the inventions are directed to treat different hosts with different disorders or symptoms, to obtain different results. They therefore have different issues regarding patentability and enablement and represent patentable distinct subject matter.
2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

#### ***SPECIES ELECTIONS***

4. Claims 1-28 ARE generic to a plurality of disclosed patentably distinct species comprising the particular mimetic. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Note a specific compound with, or without a specific metal ion is need to be elected.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shengjun Wang, Ph.D. whose telephone number is (703) 308-4554. The examiner can normally be reached on Monday-Friday from 8:30 to 5:00.
